Hannover Medical School

Universidad Católica de Córdoba
Universidad Jesuita

Double Degree M.Sc. Infection Biology, Alemania, Argentina
AMIBA

AMIBA is an international Masters program focusing on cutting edge research in infection biology and translational medicine.

*Key data

- Two year top level training program for students of biosciences & medicine in Germany and Argentina
- Double degree issued by the Hannover Medical School (GER) and the Universidad Católica de Córdoba (ARG)
- max. 10 students per year in small classes with 1-to-1 supervision
- DAHZ/CUAA's funds will cover costs related to flights, international health insurance and living costs abroad for the best 4 applications:
  - from Germany/Europe (1st year)
  - and from Argentina/South America (2nd year)
- 120 ECTS points
- Teaching is conducted in English
- Spanish or German training

*What we offer

- Scientific knowledge and state-of-the-art experimental experience in current and emerging biomedical research areas
- Scientific exchange and translational research for vaccine development and novel therapies to treat endemic diseases

*Application

- The Master of Science in Infection Biology is directed at Bachelor students and Estudiantes de Licenciatura.
- The program starts in September in Argentina (Spanish classes in August).
- The students are selected in a joint admission process and are enrolled at both universities.
  › Application deadline: 1st of June
