

Lecture Series - Regulatory Science and
Translational Research
Dr. Christian Schneider
Thursday, 18th May 2017
11.30 a.m.
TWINCORE seminar room 0.03

Interaction with regulators, e.g. in preparation of a first clinical study

Themes:

- What are the possibilities?
- How does one plan this interaction optimally? What to do as an academic group?
- Which special possibilities does one have when developing „Advanced Therapies“ (gene therapies, cell therapies, tissue engineering products)?
- From practice: How does a Scientific Advice meeting with regulators look like? What happens there? How to prepare?

Lecture in English

Dr. Christian Schneider is Director of the National Institute for Biological Standards and Control (NIBSC), Great Britain
